MEMORANDUM FOR THE RECORD

25X1A

SUBJECT: [REDACTED]

1. Prior to moving the 552-A-102 Fiber-Optic Roll Film Stereo-viewer from IAD to SPAD certain defects were discovered. Specifically (1) the "ways" were rusted, (2) the film guide roller became misaligned and was rubbing the film spool (only if a 500 foot spool was used), and (3) the objective assemblies were not properly tracking for stereo viewing.

25X1A

2. The problems listed above were pointed out to the [REDACTED] Project Engineer and he agreed to investigate these defects.
